## GRANT BENTLEY – BRISBANE SEMINAR – AUGUST 6 & 7, 2011

### Life Themes; and the treatment of Depression and Anxiety

Life themes are an integral part of assessing the mental state of a patient suffering from Depression and Anxiety. Grant will share how he uses a patient's biography to choose mental rubrics to unlock the remedy for each patient. This simple and effective technique is easy to learn and implement in your clinic.

Successful remedies are chosen using life themes, physical generals and facial analysis. The energy of every one of us lies in the events of our lives. Life themes are a new and objective way of assessing the energy patterns in a patient's life and how those patterns affect patients' mental and emotional state. Video cases showing the first consultation and follow ups will be shown.

Many patients suffer with either depression or anxiety or both. *Beyond Blue* statistics show that large groups of Australian people are affected by these disorders. Homoeopathy has a lot to offer these patients. Over a minimum of four visits 92%\* of patients experience improvement that significantly helps them in their ability to manage their lives in a normal manner. \* HFA community clinic 2010-2011
