

REMEDIES – AUGUST 2009

The following remedies have been categorised into:

- Confirmed ***
- Good results - yet to be confirmed **
- Researched but either not used constitutionally or only with one case *

Red = change or addition from previous chart.

Some remedies are noted in more than one miasm - difficult to determine - could belong to either but will only belong to one - waiting on cases to confirm.

Some remedies have been downgraded in their star rating as no further cases have been verified. Unless a single case has had a stunning result we prefer to wait to see the remedy work on at least two or three cases.

Yellow	Red	Blue	Orange	Purple	Green	Brown
Allium Cepa*(O)	Agaricus Musc**	Ambra Gris*(G)	Allium Cepa*(Y)	Asafoetida*	Asarum Europeum**	Berberis*
